Objection

Based on the criteria and the information provided below, assess the given candidate's eligibility or potential and thereby decide the action to be taken from among the given alternatives.

A public charitable trust desires to select Medical Officers for its rural hospital based on the following criteria :

The applicant must -

- (i) be holding MBBS degree with a minimum of 50% marks
- (ii) have a minimum of 4 years of experience of full-time practice in rural areas
- (iii) be ready to execute a bond of 3 years of service.
- (iv) have good knowledge of the local language.

In the case of the applicant who satisfies all other criteria except -

(A) at (ii) above, but has 4 years of full-time experience of practice either urban or semi-urban areas and spent at least 5 years in rural areas any time during his life, be referred to Secretary of the Trust

(B) at (iv) above, but has working knowledge of Hindi be referred to Assistant Secretary of the Trust.

(C) at (i) above, but has a minimum of 45% marks at MBBS and has done M.S. or M.D., with a minimum of 50%, be referred to the Chief Medical Officer (C.M.O.).

(D) at (iii) above, but is ready to give Rs. 25,000 as security money, be referred to the President of the Trust.

Case: Gauri did her M.D. after doing her MBBS. She is ready to execute three years bond of service. She has good command over local language as well as Hindi. She has practised for 5 1/2 years in remote village out of her love for social service. She has obtained 77%, 88%, 47% and 56% at SSC, HSC, MBBS and M.D. respectively.

Case: Payal, after obtaining her MBBS and M.S., decided to practice in her native village for five years. She knows the local language very well. Her dispensary and small hospital were very popular in the nearby villages. She plans to go to U.S.A. and U.K. after spending 4 more years in India. She has secured more than 60% marks in all the examinations right from SSC to M.S. She is ready to execute a bond of 3 years of service.

Logical
Reasoning

Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statement.

Statement: The best evidence of India's glorious past is the growing popularity of ayurvedic medicines in the world.

Assumption A: Ayurvedic medicines are popular in India.

Assumption B: Ayurvedic medicines are not popular in India.

Determine whether one or both assumptions are implicit or not in the given statement and choose the correct option from the options given below:

Raise /
View
Objection

313811	Only Assumption A is implicit
313812	Only Assumption B is implicit
313813	Neither Assumption A nor Assumption B are implicit
313814	Both Assumption A and Assumption B are implicit
313815	

Either Assumption A or Assumption B is implicit, but both can not be implicit at the same time

Correct Option: 313813

Candidate Response: 313811

203252

Logical Reasoning

Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statement.

Statement: "In order to bring punctuality in our office, we must provide conveyance allowance to our employees." - In charge of a company tells Personnel Manager.

Assumption A: Conveyance allowance will not help in bringing punctuality.

Assumption B: Discipline and reward should always go hand in hand.

Determine whether one or both assumptions are implicit or not in the given statement and choose the correct option from the options given below:

313816 Only Assumption A is implicit

313817 Only Assumption B is implicit

313818 Neither Assumption A nor Assumption B are implicit

313819 Both Assumption A and Assumption B are implicit

313820 Either Assumption A or Assumption B is implicit, but both can not be implicit at the same time

Logical
Reasoning

Read the following passage and answer the question that follows:

Sixty-four players seeded from seed 1 to seed 64 participated in a knock-out tennis tournament. Seed 1 is the highest seed and seed 64 is the lowest seed. The tournament will be played in six rounds i.e., first round, second round, third round, quarterfinals, semi-finals and final. In the first round, the player with the highest seed (i.e., 1) will play with the player with the lowest seed (i.e., 64), which is designated Match No.1.

Similarly, the player with the second-highest seed (i.e., 2) would play with the player with the second-lowest seed (i.e., 63), which is designated Match No.2 and so on. In the second round, the winner of the Match No.1 of the first round will play with the winner of the Match No.32 of the first round and this match is designated Match No.1 of the second round.

Similarly, the winner of the Match No.2 of the first round will play with the winner of the Match No.31 of the first round and this match is designated Match No.2 of the second round and so on. In the similar pattern the subsequent rounds will be played.

The sentences given in each question, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a letter. Choose the most logical order of sentences from among the given choices to construct a coherent paragraph.

A. As officials, their vision of a country shouldn't run too far beyond that of the local people with whom they have to deal.

B. Ambassadors have to choose their words.

C. To say what they feel they have to say, they appear to be denying or ignoring part of what they know.

D. So, with ambassadors as with other expatriates in black Africa, there appears at a first meeting a kind of ambivalence.

E. They do a specialized job and it is necessary for them to live ceremonial lives.

A. "This face-off will continue for several months given the strong convictions on either side," says a senior functionary of the high-powered task force on drought.

B. During the past week-and-half, the Central Government has sought to deny some of the earlier apprehensions over the impact of drought.

C. The recent revival of the rains had led to the emergence of a line of divide between the two.

D. The state governments, on the other hand, allege that the Centre is downplaying the crisis only to evade its full responsibility of financial assistance that is required to alleviate the damage.

E. Shrill alarm about the economic impact of an inadequate monsoon had been sounded by the Centre as well as most of the states, in late July and early August.

203431	Verbal Ability	Read the following passage carefully and answer the question that follows. (1) One of the most recent developments in tools is the robot. The latest robots can be taught to perform complex tasks that require an almost human-like ability to process information and make decisions. The word robot first appeared in a 1921 stage play by Czech writer Karel Capek. In the play, a man makes a machine that can think, which he calls a robot and which ends up killing its owner. In the 1940s, the American science fiction writer Isaac Asimov wrote a series of stories about robots and invented the term robotics, the science of robots. Meanwhile, in the real world, the first robots were developed by an engineer, Joseph F. Engelberger, and an inventor, George C. Devol. Together they started a manufacturing company that produced the first real robot in 1961. Robots of this type were installed at automobile plants and proved to be a success. They worked reliably and saved money for companies. (2) These industrial robots were nothing like the terrifying creatures that can often be seen in science fiction films. Since they were made of metal, they could perform certain jobs that were difficult or dangerous for humans, particularly jobs that involve high heat. And since robots were tireless and never got hungry, sleepy, or distracted, they were useful for tasks that would be tiring or boring for humans. Industrial robots have been improved over the years, and today they are used in many factories around the world. (3) Though the use of robots has meant the loss of some jobs, at the	Raise / View Objection										

(3) Though the use of robots has meant the loss of some jobs, at the same time other jobs have been created in the design, development, and production of the robots. Outside of industry, robots have also been developed and put to use by governments and scientists in situations where humans might be in danger. For example, they can be sent in to investigate an un-exploded bomb or an accident at a nuclear power plant. Researchers also use robots to collect samples of hot rocks or gases on active volcanoes. In space exploration, robots have performed many key tasks where humans could not be present, such as on the surface of Mars. In 2004, two robotic Rovers—small six-wheeled computerized cars—were sent to Mars. The Rovers had lasers that functioned as eyes and software that was designed to help them travel around holes or rocks. While on Mars, they performed many scientific experiments and took thousands of photographs, sending all the results back to Earth.

(4) Inventors have been more successful with robots that can help with housework. "Roomba" is made of lightweight plastic, it is low and round, with wheels. Before it begins cleaning a room, Roomba first moves all around it to "learn" about the shape of the room and the furniture in it. Then it starts vacuuming, avoiding the walls and furniture.

(5) What is the future for robots? One likely use of robots was demonstrated in a race for robot-controlled cars held in 2005 by the United States Defense Department. The winner of this race across the Nevada desert—and the winner of \$2 million—was a car model called Stanley, designed by robot specialists at a renowned university. Stanley arrived at the finish line 170 miles (273.5 km) away, after traveling over the rough land in a little less than seven hours—without a human behind the steering wheel. This was possible because its computer "brain" was able to deal with the various tasks required along the trip.

(6) Robots have come a long way. Once, story writers and movie-makers imagined them as dangerous humans, like machines that could take over the Earth. Now, robots help people at home, in factories, and in scientific research. In the next decade, many new uses will be found for robots, especially in cars. As one designer said, "A person's role in the car is changing. People will become more planners than drivers. Robots will do the rest".

Choose the statement that best expresses the overall thesis of the passage.

Read the following passage and answer the question that follows.

The Indian middle class consists of so many strata that it defies categorization under a single term class, which would imply a considerable degree of homogeneity. Yet two paradoxical features characterize its conduct fairly uniformly; extensive practice and intensive abhorrence of corruption.

In the several recent surveys of popular perceptions of corruption, politicians, of course, invariably and understandably top the list, closely followed by bureaucrats, police officers, lawyers, businessmen and others. The quintessential middle class. If teachers do not figure high on this priority list, it is not for lack of trying, but for lack of opportunities. Over the years, the sense of shock over acts of corruption in the middle class has witnessed a steady decline, as its ambitions for a better material life have soared, but the resources for meeting such ambitions have not kept pace.

What is fascinating, however, is the intense yearning of this class for a clean, corruption-less politics and society, a yearning that has again and again surfaced with any figure, public or obscure, focusing on his mission of eradicating corruption. Even the repeated failure of this promise on virtually every man's part has not subjected it to the law of diminishing returns.

Read the following passage and answer the question that follows.

The Indian middle class consists of so many strata that it defies categorization under a single term class, which would imply a considerable degree of homogeneity. Yet two paradoxical features characterize its conduct fairly uniformly; extensive practice and intensive abhorrence of corruption.

In the several recent surveys of popular perceptions of corruption, politicians, of course, invariably and understandably top the list, closely followed by bureaucrats, police officers, lawyers, businessmen and others. The quintessential middle class. If teachers do not figure high on this priority list, it is not for lack of trying, but for lack of opportunities. Over the years, the sense of shock over acts of corruption in the middle class has witnessed a steady decline, as its ambitions for a better material life have soared, but the resources for meeting such ambitions have not kept pace.

What is fascinating, however, is the intense yearning of this class for a clean, corruption-less politics and society, a yearning that has again and again surfaced with any figure, public or obscure, focusing on his mission of eradicating corruption. Even the repeated failure of this promise on virtually every man's part has not subjected it to the law of diminishing returns.

Read the following passage and answer the question that follows.

The greatest thing this age can be proud of is the birth of man in the consciousness of men. In his drunken orgies of power and national pride, man may flout and jeer at it. When organized national selfishness, racial antipathy and commercial self-seeking begin to display their ugly deformities in all their nakedness, then comes the time for man to know that his salvation is not in political organizations and extended trade relations, not in any mechanical re-arrangement of social system but in a deeper transformation of life, in the liberation of consciousness in love, in the realization of God in man.

In this passage, what does the phrase "God in man" imply?

314751	God having assumed the shape of man
314752	
314753	
314754	The divine qualities in man
314755	

Correct Option: 314754

Candidate Response: 314753
